LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software engineering undergraduate with hands-on experience building REST APIs and web applications. Focused on back-end development with Python and Java, relational databases, authentication, and automated testing. Web development experience with Astro, JavaScript, HTML, and CSS.

EDUCATION

Bachelor's Degree in Software Engineering
UNINTER | 2024 - expected graduation: December 2027

Technical Diploma in Commerce
EEEFM Eurico Salles | Completed in 2023

PROJECTS

Purchase Orders API

Individual learning project | Python, Flask, PostgreSQL | View on GitHub

- Built a REST API for purchase orders and line items, with JWT authentication and SQLAlchemy for data persistence.
- Implemented validation to prevent line items from exceeding order quantity limits, including during concurrent requests.
- Added Pytest tests, Alembic migrations, and Swagger documentation, with Docker Compose for local setup and GitHub Actions for continuous integration.

Task Management API

Individual academic project | Java, Spring Boot, MySQL | View on GitHub

- Implemented task creation, retrieval, updates, and deletion using Spring Data JPA, with input validation and consistent error handling.
- Added Flyway migrations, JUnit, Mockito, and MockMvc tests, OpenAPI documentation, and automated test runs in GitHub Actions.

Personal Portfolio

Personal project | Astro, JavaScript, HTML, CSS | View on GitHub

- Built a responsive website with reusable components, Portuguese and English content, and light and dark themes.
- Added accessibility and SEO features, with automated deployment to GitHub Pages.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML, and CSS.

Back-end and databases: Flask, Spring Boot, PostgreSQL, MySQL, SQLAlchemy, and Spring Data JPA.

Testing: Pytest, JUnit, Mockito, and MockMvc.

Tools: Git, Docker Compose, Maven, Postman, and GitHub Actions.
